

PNA Experience

Becoming a great RN begins by learning the basics of day-to-day safe practice in a supportive learning environment. It takes a special person to become a nurse. At Duke Raleigh Hospital, we offer a special place to be one as well. And it's our staff that personifies the high quality, compassionate care we're known for with a focus on providing outstanding patient care. Our 186-bed hospital offers general medical and surgical services, oncology, ICU, Telemetry and a 24-hour Emergency Department with full-time Emergency Medical Physicians. You will work within the scope of a nursing care assistant while learning the clinical skills, critical thinking and communication techniques important to the RN scope of practice.

- 10 weeks of 8 hour or 12 hour shifts (no rotation). You will work full time directly with an RN on an assigned unit. You will be able to hone your organizational skills while you gain experience with patient care. At the end of the 10-week period, you may elect to continue to work as a Nursing Assistant on an assigned unit as a casual NA.
- Class time focusing on the assessment skills, communication skills and patient advocacy in your specialty area.
- Opportunity to shadow in other areas of interest arranged by Unit Leadership.
